SPECIALIZED

Nobody designs better bikes than a bike fanatic.

And no bike company has so many of said fanatics under one roof than Specialized.

To these guys, more than to anyone else on earth, a bike's perfection is a matter of honor. Innovation here isn't a job, it's a religion—and the last one to come up with a brilliant idea is high priest for the day.

If there's any way a bike can be made faster or lighter or stronger, you can bet your house there are Specialized designers up nights figuring out how. And when they run into a problem they can't solve alone, they find people who can: engineers at DuPont, computer scientists at Stanford University, whoever.

Of course, it's often been suggested to us that there might be easier ways to make bikes (and, Lord knows, cheaper ways).

Now that, in our opinion, is going too far.
